Hayrack or wire container
Coco fiber, compressed
moss, or moss liner
Potting soil
Plants
Liquid fertilizer

In general, hayracks and wire containers are most easily installed prior to adding potting soil and plants.

Install a liner of sheet moss, coco fiber, or compressed moss. For ease of installation, soak the sheet moss in water prior to placement.

Partially fill the container with potting mix to prepare for placement of your plants.

Arrange plants according to design.

Finish filling the container with potting mix, then water thoroughly. Optional: fertilize with liquid plant food.

Finish filling the container with potting mix, then water thoroughly. Optional: fertilize with liquid plant food.

Your container is complete and ready to be enjoyed.
